

## HIGH PRESSURE REGULATOR **VARIMED**

EDITION 1/2014

**Varimed is a one stage cylinder regulator with a large variety of applications. The regulators are used for pressure monitors, anaesthetic equipment, transportation incubators, pain relief and similar areas. Varimed has an easy-to-read gauge which shows the cylinder pressure, and a quick connection for easy connection of medical equipment.**

## TECHNICAL DATA

Gas:	O <sub>2</sub> , Air, N <sub>2</sub> O
Inlet pressure:	O <sub>2</sub> , Air - 200 bar
	N <sub>2</sub> O - 60 bar
Outlet pressure:	4, 4.5 and 5 bar
	O <sub>2</sub> - 4,5 bar
	Air - 5 bar
	N <sub>2</sub> O - 4 bar
Flow capacity:	see flow curves
Outlet connection:	SS 8752430
Body material:	brass, nickel plated
Bonnet material:	painted mazak
Weight:	1,1 kg

## RECYCLING

The product shall be recycled according to local regulations.

## FLOW CHARACTERISTIC
